

**MOUNTING KIT****P-KIT****INTENDED USE**

Mager accessories for HPx series flat air bearings and HRA series are called P-KIT and are made up of three parts: a threaded ball pin, a locking ring nut and anti-rotation screw. The threaded ball pins are made of stainless steel and they guarantee a perfect coupling with the flat air bearing while the ring nut allows a stable joining.

Custom threaded ball pins can be manufactured upon customer request.
